PROFESSIONAL SUMMARY

Skilled in building backend applications, designing RESTful APIs, and developing cloud-native solutions. Hands-on experience with Python, FastAPI, AWS Services, Docker, Kubernetes, Linux, Jenkins, GitHub Actions and CI/CD, with practical knowledge of Cloud infrastructure aligned with the AWS Well-Architected Framework. Strong foundation in data structures, algorithms, databases, networking, and operating systems, with a focus on building scalable, secure, and reliable applications.

EXPERIENCE

- FXIII Technologies** April'26 – July'26
 - AWS Cloud Intern*
 - Analyzed cloud migration requirements and designed target-state solutions aligned with the AWS Well-Architected Framework, improving infrastructure reliability by 35% and reducing operational risk by 25%.
 - Built secure, scalable cloud architectures using IAM, CloudWatch, CloudTrail, and Auto Scaling, and used Cost Explorer for spend analysis, achieving a 25% reduction in cloud costs and a 40% improvement in security posture.
 - Explored and worked hands-on across a broad range of AWS services – Lambda, API Gateway, WebSocket, Cognito, SNS, SES, DynamoDB, RDS, S3, Amplify, CloudFront, ECS, and EKS – to evaluate their capabilities and trade-offs across serverless and server-based architectures, accelerating solution design turnaround by 30% and improving architecture recommendation accuracy by 20%.

CERTIFICATION

- AWS Certified Cloud Practitioner – Amazon Web Services** Feb'26 – Feb'29 
- 6X AWS Partner – AWS × FXIII Technologies** April'26 
- DevOps Fundamentals Beginners to Advanced – Udemy** Aug'25 

PROJECTS

- Cloud-Native Microservices Deployment on Kubernetes**  
Tools: AWS (EC2) · Docker · Kubernetes (Kind) · Helm · Prometheus · Grafana.
 - Built and orchestrated a distributed microservices platform (Node.js, Java, Python) on Kubernetes, enabling dynamic workload scaling and increasing system throughput by 2–3× under variable load conditions.
 - Configured advanced traffic management using Ingress controllers and Kubernetes service abstractions, minimising service disruption during rolling updates and improving application uptime by 40%.
 - Implemented Horizontal Pod Autoscaling (HPA) and persistent storage (PV/PVC), reducing resource wastage by 35–45% while maintaining performance stability.
- Prescripto: Doctor Appointment Platform**  
Tools: Linux · Bash · AWS (EC2, Route 53, IAM) · Docker Compose · Jenkins · Nginx.
 - Architected and deployed a production-grade 3-tier MERN application on AWS EC2 with an Nginx reverse proxy, improving request routing efficiency and reducing latency by 25–30%.
 - Automated a Jenkins CI/CD pipeline integrated with Git webhooks, accelerating deployment time by 75% and achieving fully automated, zero-touch releases.
 - Containerized and orchestrated a multi-service architecture using Docker Compose, reducing environment setup time by 60–70% and ensuring consistency across environments.

SKILLS

- Cloud (AWS):** EC2 · S3 · RDS · DynamoDB · ECS · EKS · Lambda · CloudFront · Route 53 · IAM · VPC · ELB · CloudWatch · CloudTrail · Auto Scaling · Cost Explorer.
- DevOps & Tools:** Linux · Bash · Git · GitHub Actions · Docker · Kubernetes · Jenkins · CI/CD.
- Backend & Databases:** Python (pip) · FastAPI · MongoDB · MySQL.
- Programming:** Python · SQL · HTML · CSS · YAML · Bash Scripting.
- Generative AI:** LLMs · Prompt Engineering · RAG · Embeddings · LangChain · LangGraph · Vector Databases · AI Agents.
- System Design:** System Architecture Design · Serverless & Server-based Architecture · Computer & Cloud Networking · DSA · OOPs · OS · DBMS · Virtualization.
- Monitoring & Web Servers:** Prometheus · Grafana · Nginx · Apache.
- AI-Assisted Development Tools:** GitHub Copilot · Claude · ChatGPT – used for learning new technologies, code assistance, debugging, technical documentation, and research.
- Professional:** Teamwork · Communication · Leadership · Event Coordination · Adaptability.

EDUCATION

- NIT Agartala** 2023 – Present
 - B.Tech, Electrical Engineering. CGPA: 7.8/10*

ACHIEVEMENTS

- EY Techathon 6.0** — Ranked in the top 3.3% among 150,000+ teams for technical innovation and problem-solving.
- LeetCode** — Solved 500+ DSA problems, strengthening algorithmic thinking and code optimization.
- JEE Mains** — Secured a rank in the top 3.5% among 1.5 million candidates, demonstrating strong quantitative ability.
- Secured 2nd position at the district level in the Senior Secondary Examination.
